Bloom

A lighting range inspired
by the first blooms of spring

Each stylised Bloom bud is lit from within creating a soft glow through its translucent porcelain petals. The buds are accented in gold with plated fixings and fine silk braided cable to bring a timeless opulence to the installations.

Each Bloom composition consists of a combination of open and closed buds creating a naturalistic appearance and provoking the image of buds unfurling at the start of the season.

Bloom · *Standard Compositions*

The Bloom range is available in different standard compositions each configured to complement a variety of locations within both contemporary and classical luxury interiors.

The compositions were designed to form beautiful soft blankets of emerging blooms each reaching towards a central focal point.

There are five standard compositions available, see page 23 for further details.

Name:	Bloom · Medium Circle · 85 (custom drop length)
Blooms:	85
Petals	Gloss white
Bloom Fixing:	Standard gold plated hubs on gold silk cable
Ceiling Fixing:	Powder-coated ceiling plate
Dimensions:	Custom drop x 800mm (diameter)

Bloom • Custom Composition

Case Study: Small

Our client briefed us to create small clusters of Blooms which would provide soft ambient bedside lighting without cluttering the surrounding walls or furniture.

The lowest buds were kept open adding a direct functional light onto the table below whereby the upper blooms were closed to keep the light source hidden when viewed from the bed.

Client:	Boutique Hotel
Location:	Private
Blooms :	3 in matt white
Bloom Fixing:	Standard gold plated hubs on gold silk cable
Ceiling Fixing:	Individual ceiling roses with integrated drivers
Dimensions:	2000mm (length) x 200mm (diameter)

Case Study: Large

Our client briefed us to create a naturalistic flow of Bloom buds above their dining room table.

As the installation was to be viewed from 360 degrees it was fundamental to the brief that the formation was visually interesting from multiple perspectives. This was achieved by designing a composition which appears to form and disperse as the viewer moves around the piece providing interest from every angle.

Due to the delicacy of the buds themselves and of the fixings, the installation maintains an aesthetic lightness which enables unobstructed views through the space to focal points beyond; another key client requirement.

Client:	Private
Location:	Private
Blooms :	200 in gloss white
Bloom Fixing:	Standard gold plated hub on gold silk cable
Ceiling Fixing:	Powder-coated ceiling plate
Dimensions:	3500mm (length) x 700mm (width) x 2000mm (drop)

Bloom · *Details*

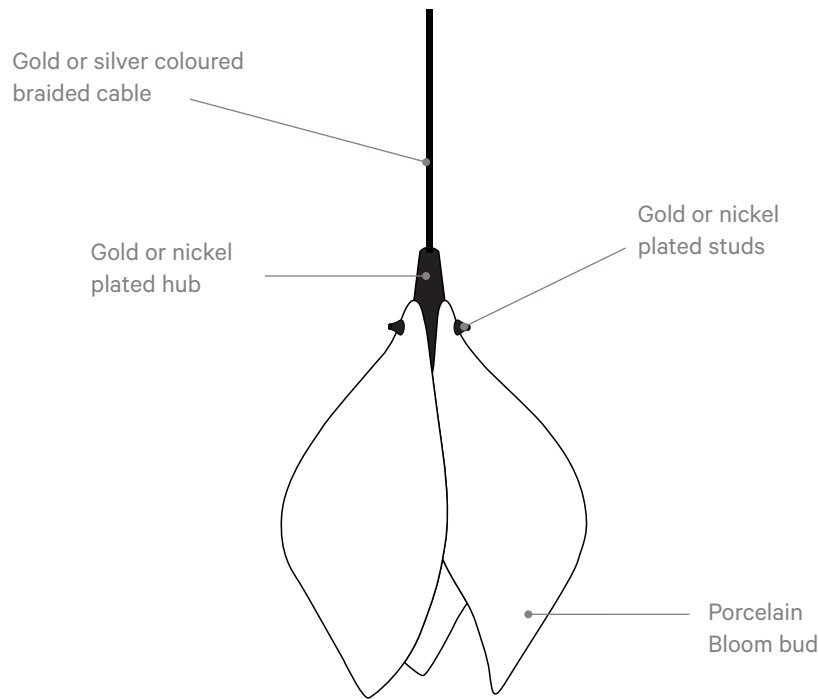

Fine light gold or silver silk braided cables power and suspend the buds from the ceiling.

Cables are attached to the buds using specially designed threaded brass hubs plated in gold or nickel (see page 25 for further details).

Bloom cables are fixed into ceilings using either:

- minimal white ceiling plates
- discrete individual ceiling roses with a choice of integrated or remote drivers

Alternatively our in-house design team can produce custom fixing solutions for more challenging spaces.

Bloom · *General Electrical Specs*

Light source
1 x G4 LED 1W 2700K (approx)
160 lumens (per bud)

Operating voltage
12V

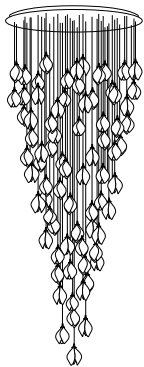

Operating watts
12W

Power requirements
100-240V

Dimmable
1-10V as standard
(drivers for alternative dimming systems available on request)
